
On Wednesday, August 23, 2023, the Town's contractor, Aqua Line Utility, Inc., will be installing new water gates on Toblin Hill Drive. The water gates will be installed on the western side of the bridge currently under construction. Water service in the area must be interrupted to allow this work to be completed. Homes in the shaded area will not have water service from 8:30 AM to approximately 5:00 PM on Wednesday. Homes in the vicinity of the project should also be prepared to not have water during that time in the event the service interruption area needs to expand due to the unknown condition of the existing water valves.
