## Spirit of Collaboration

Promoting health equity in our community through  
health-related research

We invite you to spend an afternoon with members of UMass Medical School and Community Representatives to talk about health research and its relationship with the community.

We will talk about the close relationship that exists between community members and researchers and the importance of receiving direct ideas from the community to improve health research.

Please join us in a relaxing afternoon of food, conversation,  
and mutual learning.

Your ideas will only make health research more meaningful!

All members of the Greater Worcester Community are welcome!

Saturday, March 30th, 2019

2-4 PM

Belmont A.M.E. Zion Church
